# How to Read This Report

## Introduction

This report shows how many customers used the CTA bus and rail systems for the year. Ridership statistics are given on a system-wide and route/station-level basis.

Ridership is primarily counted as *boardings*, that is, customers boarding a transit vehicle (bus or rail). On the rail system, there is a distinction between station *entries* and total rides, or *boardings*. The official totals on the Annual Summary report show the total number of *boardings* made to CTA vehicles.

## How are customers counted?

### Rail

On the rail system, a customer is counted as an *entry* each time he or she passes through a turnstile to enter a station. In the “Rail Entries” section of the report, customers are not counted when they make a free “cross-platform” transfer from one rail line to another, since they don’t pass through a turnstile to do so.

Some CTA stations serve more than one line. The “Rail Entries” report does not show the number of customers boarding each line at such stations, simply the total number of customers who entered the station. For example, even though Howard station is reported as part of the Red Line, customers also enter at Howard to ride the Purple and Yellow Lines.

### Bus

Boardings are recorded using the bus farebox and farecard reader. In the uncommon situation when there is an operating error with the farebox and it cannot be determined on which route a given trip’s boardings should be allocated, these boardings are tallied as Route 0. These are not included in the Ridership by Route section of the report, however they are included in the monthly bus system totals.

## How do I compare this year to last year? What is a “Calendar Adjustment”?

When comparing one year to another, it is often best to use the weekday, Saturday, and Sunday averages rather than totals. A monthly or annual total is affected by not only the number of weekdays, Saturdays, and Sundays, which can vary somewhat from year to year, but also based on what days of the week certain holidays fall on. For example, April 2016 and 2017 had the following breakdown of days:

	2016	2017
Weekdays	21	20
Saturdays	5	5
Sunday/Holidays	4	5

As weekdays typically have much higher ridership than Saturdays, April 2016 would report higher total monthly ridership than April 2017, all else equal. Using averages by day type circumvents this problem.

For the purposes of month-to-month and year-over-year comparisons, the report also includes a “Calendar Adjusted” annual total of bus, rail, and system ridership. This is calculated by applying a normalization factor to a given month’s total ridership figures to correct any discrepancies in the number of weekdays, Saturdays, and Sundays, thereby making the data comparable.

Note that New Year’s Day, Memorial Day, Independence Day, Labor Day, Thanksgiving, and Christmas Day are considered as “Sundays” for the purposes of ridership reporting, as CTA operates a Sunday schedule on these holidays. All other holidays are reported as the type of day they fall on.

# Executive Summary – September 2020

## System Overview

Total system ridership decreased 68% in September this year compared to last year. Bus decreased by 60% and rail decreased by 77%. Ridership losses were due to the CoVid-19 Virus Pandemic. For the year, system ridership is down 53% with bus down 45% and rail down 62%.

The City of Chicago entered Phase 4 of the statewide re-opening plan on June 26th and stayed in Phase 4 throughout the month of September. Ridership increased soon after both the Phase 3 (June 3rd) and Phase 4 re-openings, but has remained relatively stable through September.

The 68% year-over-year loss in September was slightly higher than August (67%) and July (67%) performance, but was better by around six percentage points compared to June (74%).

## Bus

Bus ridership decreased 60% this month compared with a year ago in September and was around three percentage points higher than the 57% loss in August.

Performance on the Downtown route group was lower than all the other route groups down 86%. The other routes groups near the central business district which include the Downtown, North Side Lake Shore Drive and Northside-Downtown route groups continue to see bigger losses than the rest of city down at least 61%.

The Far South bus route group was the best performing of the month down 54% with the South Side East-West group down 55%. The West Side East-West route group was down 62%.

## Rail

Rail ridership decreased 77% compared with September 2019. Ridership in July and August were down 78% on a year-over-year basis as well. Rail was down 88% in April and May.

The Downtown subway branches and Loop stations performance were much lower than the rest of rail, down 82-85%. On the South Side, the Dan Ryan branch and Green Line South extension branches were down 58-69%. On the West Side, the Pink Line, Blue Line-Forest Park Branch and Green Line-Lake Street branch were each down 63-75%.

# Monthly Notes – September 2020

The following changes in CTA service over the past year have a potential impact on this month's ridership figures.

## Systemwide Service Impacts

### Station Closures

Rail stations can be closed occasionally for construction. The closures can result in what appears to be very dramatic increases or decreases (e.g. > 20%) in average daily rail ridership on a year-over-year basis both for the station being closed and potentially for nearby stations as well. *When service is suspended or rerouted on the rail system, service is maintained by a bus shuttle connecting the closed or bypassed rail stations. Riders on this shuttle are tallied in the "Bus Ridership by Route" section as Route #1001 Shuttle/Special Event Route.*

Chicago Department of Public Health Shelter in Place started 03/18/20.

## Rail Service Impacts

### Temporary Service Suspensions and Reroutes

Due to ongoing construction activity to maintain and modernize the CTA rail system, some lines experience periodic day, night, & weekend closures or reroutes.

When analyzing monthly ridership trends, it is important to account for the possibility that the same month may have a different number of weekdays, Saturdays, and Sundays each year. Monthly ridership statistics are provided below as both 'actual total' and 'calendar adjusted total', the latter being a normalized figure that facilitates year-to-year and month-to-month comparisons.
